

DELOS 3-STAGE WATER FILTRATION SYSTEM (POINT OF ENTRY)

The Delos 3-Stage Water Filtration System harnesses three unique stages of filtration to provide clean and great tasting water from every tap and shower in the home. Sediment filtration helps reduce overall particle load while carbon filtration targets chlorine in the water. Reducing chlorine helps mitigate the risk of skin irritation and stomach discomfort, and improves the taste and odour of your water. Lastly, a Kinetic Degradation Fluxion (KDF) filter targets key chemicals and heavy metals like chlorine, mercury, iron and hydrogen sulfide. Eliminating these elements reduces the risk of kidney issues, stomach discomfort and irritation to the skin and mucous membranes.

DETAILED SPECIFICATIONS 3-STAGE WATER FILTRATION:

Model	DWWAT001206
Unit Size	610mm x 505mm x 230mm
Working pressure	210 - 600 kPa
Working water temperature	5 ~ 38°C
Flow rate	35 LPM
Environmental temperature	5 ~ 38°C
Cartridge life	140,000L @15LPM
Inlet and outlet size	¾" BSPT male thread
