

DELOS UNDERSINK WATER FILTRATION SYSTEM (POU)

The Delos Undersink Water Filtration System delivers great-tasting, filtered water at any specified sink in the home. This filtration helps rid water of unwanted sediment, chlorine, lead, particulate and chemical impurities and is NSF/ANSI Standard 53 certified to reduce cysts such as Cryptosporidium and Giardia by mechanical means. It also enables a fast, more convenient flow of water.

DETAILED SPECIFICATIONS UNDERSINK WATER FILTRATION SYSTEM:

Model	DWWAT001PBS
Micron Size	0.5 micron (nominal rating)
Working Pressure	0.7 - 8.6 bar
Working Water Temperature	2-38°C
Environmental Temperature	2-38°C (cold water use only)
Flow rate	8.3 LPM
Cartridge Life	11,356 Liter capacity
Required Space (mm)	130 W x 510 H x 130D
